RE: EARTC

To Whom it May Concern:

I am writing this letter of recommendation on behalf of EARTC. HMI utilized EARTC on a large, high profile project in Austin, TX. This project consisted of placement, termination and testing of fiber optic cable, power cables, power distribution panels and telecommunication switches along 33 miles of railroad right-of-way. The project consisted of many environmental, logistical and scheduling hardships. EARTC performed quality work within the agreed to time lines and conducted themselves with integrity. HMI's customer was extremely pleased with the support they provided up to, during and after cut-over of the system. HMI would highly recommend EARTC for any future projects.

If you have any questions or require any further information, feel free to call me at 972-512-2940.

Sincerely,

Dave Parrott
